- 3) What are the next steps in moving forward towards that goal?
- 4) Who is willing to lead?

2:15 Closing session
Breakout Discussion Reports – Round 2
Next steps action planning

2:45 Adjourn

Why should you attend?

Broadband affects all of us, whether a business, a school, another government sector or a resident; we are all connected in many ways. At this summit, attendees will learn about what is currently being done in the broadband field, both locally and statewide. You will also here from regional businesses, educational representatives, and the government sector about the issues they face in using broadband services. Most of the day will be spent gathering your input about the challenges you face in relation to broadband and the direction broadband should move forward in our region. Working together and building a coalition on broadband issues is a desired outcome, with this event providing networking opportunities. This event is an opportunity to leverage existing infrastructure for collaboration around economic development, education, health care and government for operational efficiencies and innovation.

Registration:

Register at <http://www.kanabecbroadband.org/ecsummit/>. There is a \$10 re-fundable registration fee. For more information on registration please contact Jenny Gilman, ECMECC at 320-396-5213 or jgilman@ecmecc.org. Registration is limited to the first 150 that sign up. The registration deadline is Thursday Feb. 14, 2013.

If you would like more information about the event, please contact:
