Be prepared for partner discussions

PREPARED COMMUNITES ARE POISED TO WIN

Bring data (and make it simple to get more)

- Existing provider data
- Publicly owned assets (land, towers, buildings)
- Leverage existing relationships (local businesses, other utilities)
- Survey data – both existing and new

Leverage existing experts

- County staff knowing of poor areas and the challenges
- Local leaders
- Community finance and regulatory experts
- Social media/PR resources

Community’s existing tools

- Manpower to help with data collection
- GIS and other software
- Make it easy for partners

THE PROCESS

Get resident feedback

Current challenges

Opportunities

Identify areas that are the best to focus on

Anecdotal evidence

Community ED/Growth areas

Quantify demand

Get user commitment

Find partners with aligning goals

Help identify phases

Collecting data

COLLECTING DATA

SURVEY VS. QUESTIONNAIRE

SOCIAL MEDIA VS PHONE CALLING/DOOR KNOCKING

Balancing cost and time challenges

What's this all about?

For years Isanti county, especially the rural areas have struggled with slow Internet.

The Challenge:

Healthcare, business, education, social interaction and more all suffer without fast internet. Without it, our quality of life is reduced, and our communities suffer. All residents rely on Internet – even if they don't use it.

Why is it like this?

Due to the significant costs, (as much as $10,000 per home), providers simply cannot make a viable business case to offer these services in rural areas.

Solution

Isanti county has decided to help by providing funding to construct a new fiber and wireless network, and partnering with XXXX to operate it.

Why public dollars?

Since fast Internet service benefits the entire county, the county is willing to finance this project for the good of all residents.

Share your support

So if you haven't already, add your name to the map above, then share this with your neighbors.

Follow and share this project

Why is the Internet slow here?

Many rural areas struggle with slow Internet. Because the costs of bringing substantial improvements is so high, it's not profitable to provide service in areas with low density – and that's where local governments can help by partnering with Interner Service Providers.
